

## What is racism?

*Racism is when you judge someone by their features which could be their eyes, skin, language they speak and their countries they come from.*

*Even though you say a little comment of racism to someone it leads it to war.*

*Although you think saying something racist is funny, it's not because you never know it will hurt someones feelings very badly.*

# Why is racism dangerous and illegal?

It is dangerous because if you say racist things to someone, they might tell their parents to call the police.

It is illegal because people will get really upset if you say something racist to them.

Being racist is illegal and dangerous because if you get caught being racist then you could spend most of your year in prison!!!

# How can we make sure that we are not racist?

*We can make sure that we are not racist by not listening to people who are being racist.*

*Never judging someone by their features.*

*We can not be racist by listening to the people who are not saying anything racist.*

How does racism make people feel?

**There's No Such Thing  
as Reverse-Racism!**

It feels annoying because when people say racist things to you, you feel offended and it's like a bee stung you.

Thank you for listening ! Hope you enjoyed.
